

Connecting Rockaway: Re-creeking with infrastructure

- Kayak launching station
- Boardwalk on stilts
- Thick eco-buffer with mangroves
- Community spaces for events
- Food stalls and carts

- Eco-buffer with thick plantation of shrubs
- Community street network with signages and activities connecting all major landmarks.
- Community gardens on vacant plots adjoining the bay with elevated connections to the water

Boardwalk developments should be elevated with salt resistant plants marshes,

Eventual conversion of the entire town into an amphibious society

Boardwalks and floating farms towards the bay-side Houses on stilts and amphibious road networks Urban ag farms in unused and neglected spaces.

Asphalt towards the sea Unkept sidewalks basement buildings non-permeable surfaces
